

# ECO BUILDER

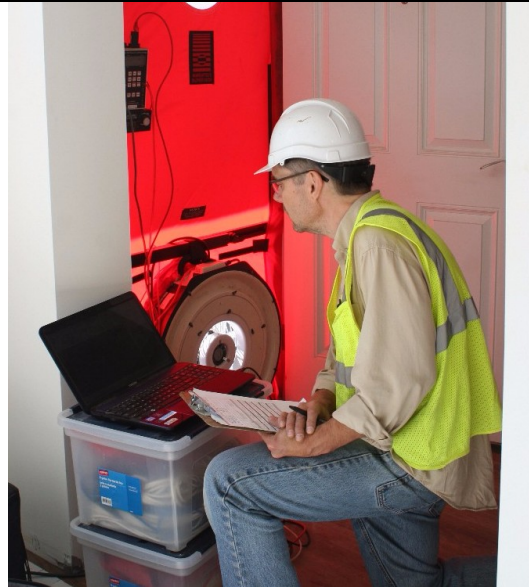

Resources for green  
building professionals.

September 2016

The Massachusetts building code is changing to include state amendments to the base energy code and stretch energy code. It will become effective January 1, 2017. Are you up-to-date with the new requirements?

We still have space in our training workshops to help builders and industry partners understand the changes. We will also offer practical solutions to meet the new standards.

---

The Center for EcoTechnology is here to help builders, architects, and HVAC professionals with high-performance goals to achieve optimum energy efficiency in their residential new construction or full renovation projects.

Call CET for assistance with meeting energy code requirements, earning utility incentives of up to \$4,500 per home, or achieving a green building certification!
